

END-USER LICENSE AGREEMENT

REPUTATION SENTINEL OS v3.0 | ARCHITECTURAL ASSET

This License Agreement is a legal contract between the Purchaser and Naroka Automation Studios. By downloading, installing, or utilizing the Reputation Sentinel OS v3.0 n8n template, you confirm your acceptance of these terms.

1. OWNERSHIP OF INTELLECTUAL PROPERTY

The Reputation Sentinel OS v3.0, including its 1,500+ logic gates, node configurations, custom JavaScript code, and the proprietary "Quartet" fallback algorithms, remains the exclusive intellectual property of Naroka Automation Studios. This purchase grants a license to use, not a transfer of ownership.

2. PERMITTED USE & LICENSING

The Purchaser is granted a non-exclusive, perpetual, non-transferable license to deploy the template for:

- Internal business operations of the purchasing entity.
- Managed services provided to the direct clients of the purchasing agency (White-labeling permitted at the UI level).

3. PROHIBITED ACTIONS

The Purchaser is strictly prohibited from:

- Reselling, sub-licensing, or redistributing the raw .json blueprint on any public or private marketplace.
- Sharing the technical documentation, whitepapers, or logic maps with competing automation developers.
- Reverse-engineering the core "Sentinel Shield" logic to create a competing commercial template.

4. DATA SOVEREIGNTY & RESPONSIBILITY

Naroka Automation Studios provides the architectural framework. The Purchaser is solely responsible for the configuration of their private server, the security of their API keys, and the ethical deployment of the autonomous agents. Naroka Automation Studios has no access to the Purchaser's data after the point of sale.

5. DISCLAIMER OF WARRANTY

The software is provided "as is" without warranty of any kind. Naroka Automation Studios does not guarantee the uptime of third-party providers (OpenAI, n8n, Anthropic, etc.) or the legal outcome of autonomous PR actions.

6. TERMINATION

Violation of the "No Redistribution" clause will result in immediate termination of the license and potential legal action to protect the proprietary trade secrets of Naroka Automation Studios.
